Proje hakkında

Technology is very important for effective teaching and learning.It also helps our students to learn the language with fun.We aim to integrate the web tools into English lessons,create games-flashcards-puzzles etc.These activities will increase the success and awareness of the students in language learning.

HEDEFLER

The main aims of the project ;
-to improve the English levels of students
-to integrate technology into the lesson
-to use new teaching techniques and web tools
-to make the lesson more enjoyable
-to raise the creativity,develop teamwork
-to make the students active during the lesson
-to improve four language skills.
